CapitalLink loans are available to qualified existing private, for-profit businesses or start-up enterprises through the listed service providers. CapitalLink provides first time loans up to \$10,000 and growth loans up to \$25,000 for those that successfully pay their original loans. The term of the loan is determined by need, but will not exceed three years for loans less than \$10,000 or up to 5 years for larger loans. Based on the business requirements of an enterprise, special terms such as flex-payments and interest-only payments will be considered. Interest rates are up to 12%, based on credit history, experience, and collateral available. Contact a local service provider in your area to learn more.
